

The Messiah's Sacrifice

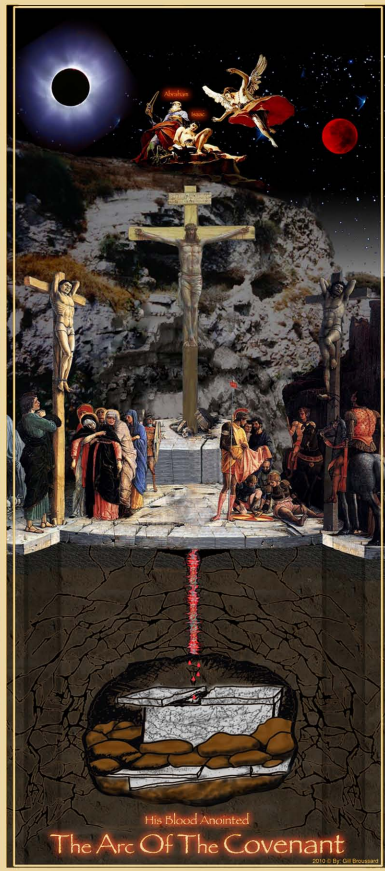

The Messiah's Sacrifice

The Place of Sacrifice & The Ark

The location of the Ark, unknown for thousands of years, has been the subject of great supposition, among Bible students and archaeologists alike. Is it in a cave on Mt. Nebo? - or perhaps concealed beneath a church in Ethiopia? While the speculation continues, there is one man who claimed to have personally seen the Ark of the Covenant - Ron Wyatt. Ron claimed to have located the Ark in Jerusalem, hidden away in a cave system beneath the Calvary escarpment, an area referenced in the Bible as the place of the skull, the sacrifice site of Yeshua, Yeshua of Nazareth - The Messiah of Israel.

Not only did Ron Wyatt claim to have located the Ark, but he also claimed that the Messiah's sacrifice took place directly above the location of the Ark - that an earthquake at that time opened a fissure between the sacrifice site and that of the Ark - and that the blood of Messiah flowed down through that crack and on to the Mercy Seat of the Ark of the Covenant. The Bible states that without the shedding of blood there is no remission. Ron claimed that just as the blood of sacrificial animals, the blood of Yeshua, the lamb that was slain, literally fulfilled the covenant requirement for atonement.

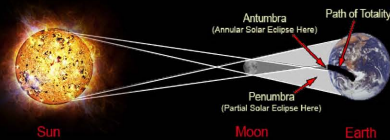

His Blood Anointed
The Ark Of The Covenant

Historical Evidence

Pontius Pilate, Procurator of Judea

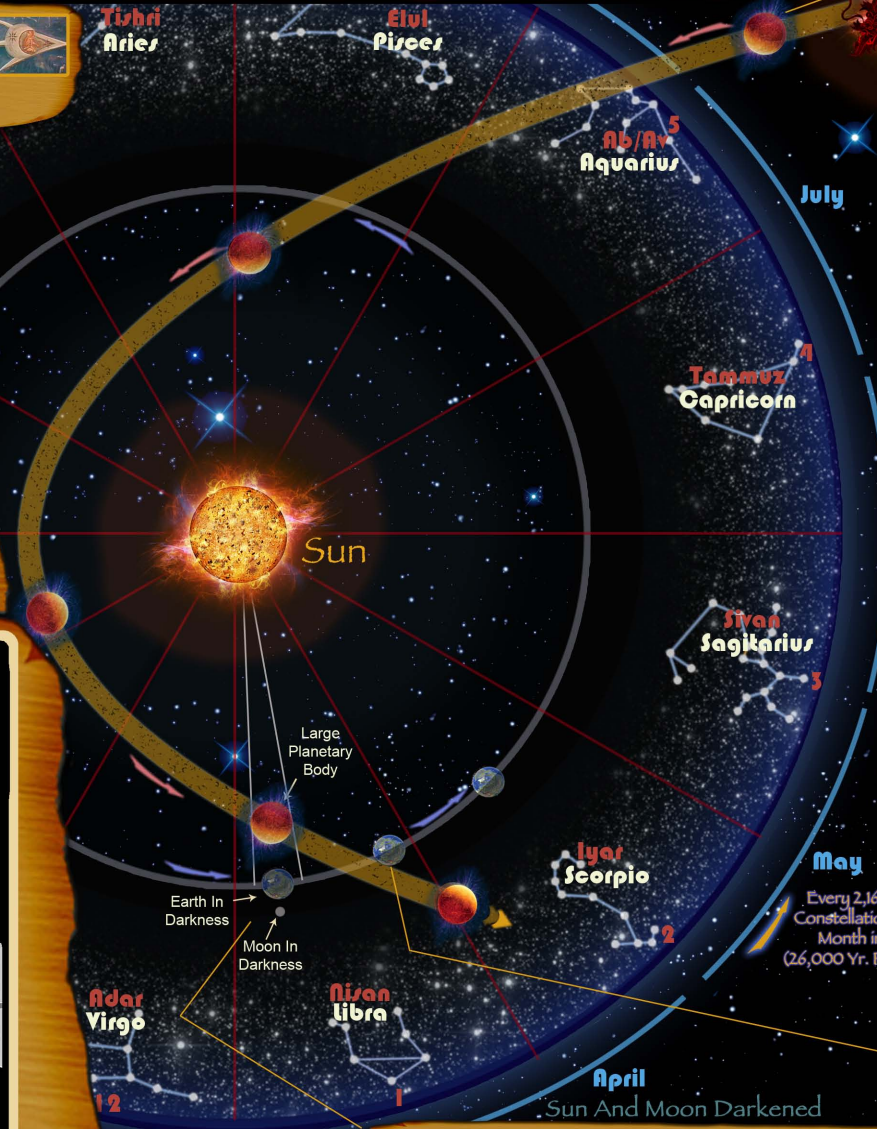

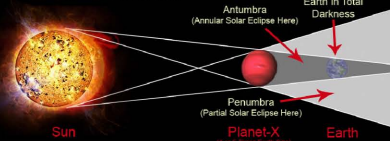

The Report of Pontius Pilate, Procurator of Judea to Tiberius Caesar: "And when he had been sacrificed there was darkness over the whole earth, the sun having been completely hidden, and the heaven appearing dark though it was day, so that the stars appeared, but had at the same time their brightness darkened, as I suppose your reverence is not ignorant of, because in all the world they lighted lamps from the sixth hour until evening. And the moon, being like blood, did not shine the whole night, and yet she happened to be at the full."

Sun Eclipsed By ?

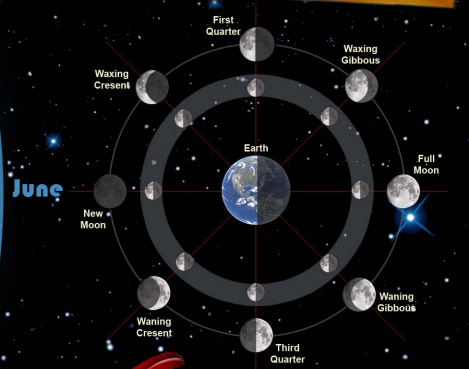

Path of Totality

A typical eclipse darkens only a small band across Earth surface for a maximum length of time of 7 minutes 31 second; this could not explain darkness over the whole Earth... So what was it?

Julius Africanus

Julius Africanus was a Christian chronographer of the late second century. In a comment on the darkness that fell upon the land during the sacrifice (Mark 15:33), Africanus states that "Thallus, in the third book of his histories, explains away this darkness as an eclipse of the sun." Africanus stated his objection to the report arguing that an eclipse of the sun cannot occur during the full moon, as was the case when Yeshua died on the eve of Passover. The force of the reference to Thallus is that the circumstances of Yeshua's death were known and discussed in the Imperial City as early as the middle of the first century.

Lunar Eclipse Require A New Moon Not A Full Moon

This rules out a natural event like a lunar eclipse; it is physically impossible for a lunar eclipse to occur on a "full" Moon, you need a "new" Moon. Yeshua was sacrificed the day before Passover which always falls on a full Moon.

Earthquake

Matt. 27:51-54

At that moment the curtain of the temple was torn in two from top to bottom. The earth shook, the rocks split and the tombs broke open. The bodies of many holy people who had died were raised to life. They came out of the tombs after Yeshua's resurrection and went into the holy city and appeared to many people. When the centurion and those with him who were guarding Yeshua saw the earthquake and all that had happened, they were terrified, and exclaimed, "Surely he was the Son of God!"

Matt. 27:45; Mark 15:33 Luke 23:44-45

The sun and moon became dark for three hours at the Messiah sacrifice.
